

Get beyond automation, and make sure your budget is going exactly where it should.

Automating T&E processes is a critical part of managing spending, but it's only the first step. When you integrate all employee spending, from p-card to invoices, you can align your spending with your strategic priorities and get control of it all.

Why does it matter?

What should you do?

How can we help?

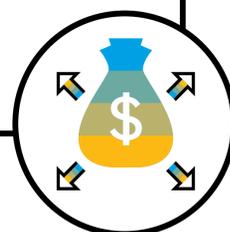

Take strategic control of all your spending with SAP® Concur® solutions for integrated travel, expense and invoice.

Accounts Payable can spend more time evaluating what and where employees are spending – and how it could be better.

Finance, budget owners and procurement can make sure precious funds get used in precisely the right places – and put a true spend-substantiation process in place.

Treasury can choose who to pay when to take advantage of early pay discounts – and hang on to cash as long as possible.
