

Transform your financial data into actionable insight

Get accurate, integrated financial data with SAP Concur

There's no question that accurate, actionable data is key to business success. SAP® Concur® financial connectors and our partner ERP solutions integrate your financial, HR, travel and expense systems, transforming your data into actionable insights that will help you manage your business effectively.

Greater Visibility

Seamless integration between your Finance, HR, and T&E systems gives you a complete view of your financial data, all in one place. Customizable dashboards and easy, robust reporting provides stakeholders with the tools and information they need to make better business decisions, from the immediate discovery of excess spend and out-of-policy spending to ensuring compliance with current tax rules and regulatory standards.

Cost Savings

Manual and paper-based systems can lead to revenue leakage, loss of savings, and inefficiencies across the entire expense management process. An integrated solution automates this process from end to end, allowing for continual communication between systems and automatic syncing of data. No more time-consuming manual data extracts and imports. Instead, employees can save time and focus on what matters most to your business.

Effortless Integration

SAP Concur connectors and our partner ERP solutions are pre-built and cloud-based, enabling rapid deployment that requires zero to minimal IT resources. Implementation is streamlined through flexible mapping that allows all account code values to be easily and accurately mapped to appropriate general ledger distributions. This flexibility also accommodates future changes in mapping, giving you the agility to meet the demands of an ever-changing business environment.

“Eliminating the need to manually transfer expense claims to AP transactions within Dynamics GP has made the largest impact to our internal efficiency. What used to take 8 to 12 hours is now done in 30 minutes, and we’ve also lowered the cost of reimbursing our employees.”

Wes Farquharson, IT Manager for Grand Valley Fortifiers
